INTRODUCTION

Welcome to MaoCat World

The 2024 Ethereum Denkun upgrade has been completed.
We are "MAO", a cat born in the Ethereum ecosystem ERC-20.
We are MAO Cats, derived from the Chinese word Máo, meaning cat.
If before there were dogs and frogs, now in the cat era we have MAO.

We are more than just memes, there is a lot to the Ethereum ecosystem.
Let's connect the functions.

There are three representative ecosystems in MAO CAT WORLD.

The governance token primarily used in this ecosystem is \$mao.

THE MAO CAT WORLD

We have three representative ecosystems.
\$Mao is the primary governance token to be used in this ecosystem.

MAO SWAP

We will even dominate the defi area, which is the basis of WEB3. We can prepare a launchpad for cats and memes similar to us. Equipped with DEX functions such as launchpad function and MAO POOL MAO SWAP We will further expand the MAO ecosystem.

MAO SWAP (FARMING AND DEFI)

In MAO SWAP V1, you can experience Web 3.0 and various DEFI ecosystem functions.

-SWAP & LIQUIDITY

We present MAOSWAP V1, an innovative decentralized exchange protocol that uses a novel decentralized centralized liquidity mechanism as an Automated Market Maker (AMM) on the ETH Smart Chain.

Biswap V1 is specifically designed to run on the Ethereum Virtual Machine and increases trading volume and LP returns, ensuring a stable Annual Percentage Rate (APR).

This mechanism combines the concentrated liquidity of liquidity providers with the one-time liquidity of limit orders, minimizing price downside during trading and allowing flexibility in limit orders.

The introduction of MAOSWAP V1 aims to advance the DeFi ecosystem by providing greater capital efficiency, control and flexibility to liquidity providers and implementing new features.

-FARMING

MAO SWAP DEX may launch a Fixed Staking feature

Implemented on the ETH chain. Could be the first cat DEX

MAO SWAP aims to provide users with the most profitable and convenient products to earn cryptocurrency. Locked staking offers users the following outstanding benefits:

- Staking Token Rewards

Powerful blockchain projects can launch their tokens through MAO SWAP's initial DEX offering.

Cats in particular will receive more attention.

The IDO process built on MAOSWAP is very effective and provides powerful utility for newly launched tokens.

What is IDO?

IDO (Initial DEX Offering) is the process by which a project releases tokens through a DEX liquidity exchange. Through IDO, blockchain projects and MAOSWAP strengthen their products.

In order to participate in the launchpad that will be released by MAOSWAP in the future, You may need \$MAO and \$ETH.
